

Complete hospital management — AI + modular services on one platform

TechEarnest purple brand edition. Built for hospitals that want clinical care, diagnostics, pharmacy, inpatient, billing and assets without tool sprawl.

Purpose of this flyer: introduce Health360 as TechEarnest's digital healthcare product — so partners see why it exists, what it aims to solve, and which hospital services it covers.

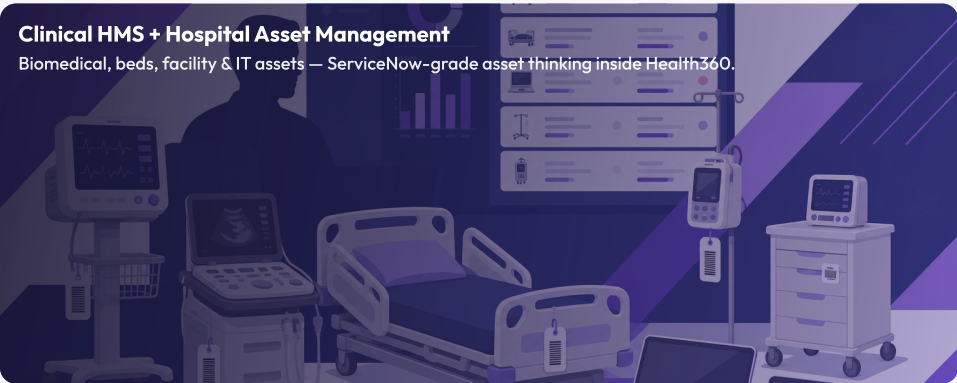

Aim: one patient journey — book → queue → consult → e-Rx → lab → pharmacy → follow-up

Why hospitals need Health360

Paper slips, invisible queues, and disconnected lab/pharmacy tools break continuity. Health360 reconnects the hospital as modular services with AI-assisted visibility.

Purpose Advertise a ready hospital OS from TechEarnest — not a partnership pitch.	Aim Digitize every care step on one encounter spine with UHID identity.	Outcome Less waiting, fewer handoffs, full history for the next visit.	
 Front-office services Appointments, desk arrive, live OPD queue, tokens, visit status sync.	 Clinical services Encounter hub, catalogs, e-Rx, wellness, follow-up, checkout gate.	 Fulfilment services Lab book→report, pharmacy dispense & MAR, radiology & OT.	
 UHID	 E-Rx	 Pharmacy	 IPD/ICU
 AI Insights	 Wellness	 Billing	 Assets

Clinical HMS + Hospital Asset Management

Biomedical, beds, facility & IT assets — ServiceNow-grade asset thinking inside Health360.
